

RISK DISCLOSURE

1. Introduction. This Risk Disclosure ("Disclosure") is established to inform clients and stakeholders about the inherent risks associated with investing in crypto assets. As a Service provider, we are committed to transparency, risk assessment, and prudent investment practices. However, all investors should be aware that crypto asset investments carry significant risks.

2. Market Risk. Crypto assets are highly volatile, and their prices may fluctuate significantly due to market sentiment, regulatory developments, technological advancements, and macroeconomic trends. Investors should be prepared for the possibility of substantial losses.

3. Liquidity Risk. Crypto markets can experience liquidity shortages, making it difficult to buy or sell assets at desired prices. Certain crypto assets may become illiquid, resulting in potential delays or losses when liquidating positions.

4. Regulatory Risk. Regulatory frameworks for crypto assets vary by jurisdiction and are subject to change. Government actions, legal restrictions, or regulatory enforcement can impact the value and legality of certain crypto assets.

5. Security Risk. Digital assets are susceptible to cybersecurity threats, hacking, fraud, and technological failures. Despite best security practices, there is always a risk of loss due to unauthorized access, phishing attacks, or vulnerabilities in smart contracts and exchanges.

6. Counterparty Risk. Engaging with third-party service providers, including exchanges, custodians, and lending platforms, exposes investors to counterparty risks. The insolvency or mismanagement of such entities can lead to asset loss or restricted access to funds.

7. Operational Risk. Errors in trading execution, system failures, or human errors may result in financial losses. Service providers employ risk management protocols, but operational risks cannot be entirely eliminated.

8. Taxation and Legal Risk. Tax treatment of crypto asset investments varies across jurisdictions. Investors are responsible for understanding and complying with applicable tax obligations. Changes in tax policies may affect investment outcomes.

9. Technology and Innovation Risk. Crypto assets rely on emerging technologies, including blockchain. Technical issues, software bugs, and network disruptions can affect asset values and functionality. Additionally, newer innovations may render existing crypto assets obsolete.

10. Risk Mitigation Measures. While risk cannot be eliminated, the Service provider implements ongoing monitoring of regulatory changes and market conditions; Comprehensive due diligence on investment opportunities and counterparties; Robust cybersecurity measures and operational controls.

11. Client Acknowledgment. By investing in crypto assets, investors acknowledge and accept the risks outlined in this Disclosure. The Service provider does not guarantee returns or protection against losses. Investors should conduct their own research and seek independent financial advice.

12. Amendments. This Disclosure is subject to periodic review and may be updated to reflect changes in market conditions, regulatory requirements, and risk management best practices. Any material changes will be communicated to clients in a timely manner.

13. Contact Information. For any questions or concerns regarding this Disclosure, please contact Service provider.
